INTRODUCTION

Now the world of education in Indonesia is faced with challenges that must be solved in the learning process. From teachers, many students are less able to maximize digitization and complaints obtained due to the adaptation process of learning acceptance from face-to-face models and distance learning.

Schools have challenges in realizing ethical values in virtual learning because of the gap between ethical theory and their applications in the real world. In the era of life activities from the economy, the world of education and health is forced to do daily activities with digital. But the reference material is in the process of learning and education for students.
The implementation of learning is felt to be less able to adapt well from ethics when in learning to assignments made by students. So the purpose in this study produces how character education can be used as a reference in the application of virtual learning that can improve the ability and understanding of students. As well as raising the spirit of learning as before the pandemic.
Literature Review

- Character Development Overview
- Distance learning overview
- Zoom Cloud Meeting
- Digital Ethics review
Method

RESEARCH APPROACH: QUALITATIVE

RESEARCH METHOD: CASE STUDY

DATA COLLECTION:
• OBSERVATION
• INTERVIEW
• DOCUMENTATION

DATA ANALYSIS:
• DATA REDUCTION
• PRESENTATION OF DATA
• CONCLUSION / VERIFICATION
Character education, character education shapes and develops the potential of students to think good, have good hearts, and behave in accordance with the Pancasila philosophy.

Distance learning is learning that is done online as well as through virtual online.

Digital ethics, what is meant here is the habits of students in the pandemic era in distance learning. There are still many students who are not ready for distance learning from disappearing in the zoom to the point where it is difficult to activate the camera.
The world is faced with a COVID-19 pandemic situation. All fields, from the social, economic, health and education fields face quite heavy problems. including in the world of education that must do distance learning, mental readiness in distance learning is felt to be lacking. because there are many problems from students who find it difficult to attend the zoom, it is difficult to activate the camera and not do the task. So it is hoped that the cultivation of character in students and the direction of digital ethics can overcome problems in distance learning.
